generate a 12 bar blues progression in minor e

Sure, here's a 12-bar blues progression in the key of E minor:

Copy code

```
| Em7 | -   | -   | -   |
| Am7 | -   | Em7 | -   |
| B7  | -   | Am7 | -   |
| Em7 | B7  | -   | -   |
```

In this progression, each bar is represented by four beats in 4/4 time signature. The chord symbols represent the type of chord to play in each bar. The "m7" signifies a minor 7th chord, and "B7" is a dominant 7th chord.

Feel free to experiment with rhythm, strumming patterns, and variations to create your desired blues sound.

1842

Supposing, for instance, that the fundamental relations of pitched sounds in the science of harmony and of musical composition were susceptible of such expression and adaptations, the engine might compose elaborate and scientific pieces of music of any degree of complexity or extent.
